

Calendar Extension

The Calendar extension is a full-featured calendaring application that displays multiple views of calendar events created by Web site users. Ideal for an intranet solution, the Calendar extension simplifies the process of maintaining a Web-based organizational calendar.

Business Case: A key to executing any effective strategy is keeping all participants focused and on-track. A calendaring function that organizes deadlines, schedules and events greatly enhances any organizational communication tool. The Calendar extension offers event and schedule management tools from the InterLoom Editor. It also provides InterLoom™ Web objects for creating and displaying events and event lists from the Web site.

Feature	Benefit
Multiple view event list	View events in day, week, month, or year views

InterLoom Objects	Functions
Calendar	Displays a calendar with the capability of scrolling back and forward between months.
Calendar Event	Displays a single event.
Calendar Event List	Displays a list of events for a month, week, or day.

InterLoom Manager	Function
Calendar Manager	Creates and manages calendar events from the InterLoom Editor.
